

Register of Risks

The risk register identifies the possible risks related to the development of the AI-assisted Government Document Management System. The documentation includes risk description, category, probability, impact, and priority.

ID	Risk Description	Category	Probability	Impact	Priority	Mitigation Strategy
R1	AI document classificatio gives incorrect results	Technical	Medium	High	High	rule-based fallback + manual review
R2	PDF upload or file handling fails (corrupted/unsupported files)	Technical	Medium	High	High	Validate file type/size + error handling
R3	Integration between Django app and AI module fails	Technical	Low	High	Low	Use API interface + modular testing
R4	Poor UI/UX makes system hard to use for applicants	Usability	Medium	Medium	Medium	Conduct simple usability testing
R5	Role-based access control incorrectly implemented	Security	Low	High	Medium	Implement and test permissions thoroughly
R6	Team member unavailable (illness, exams, etc.)	Team	Medium	Medium	Medium	Share knowledge + flexible task assignment
R7	Poor communication between team members	Team	Medium	Medium	Medium	Weekly meetings + task tracking (Jira)
R8	Deadlines not met due to underestimation of tasks	Project	Medium	High	High	Break tasks into smaller parts + buffer time
R9	Incorrect routing logic sends cases to wrong department	Functional	Medium	High	High	Test routing rules with sample cases
R10	Notification system fails or delays updates	Technical	Low	Medium	Low	Implement retry mechanism
R11	Users upload incomplete or invalid documents	External	High	Medium	High	Strong validation + clear instructions
R12	Deployment issues	DevOps	Medium	Medium	Medium	Test deployment early
